

David has built a large repertoire of topics he can deliver depending on the event, timeframe, venue and/or audience. He also addresses groups in a seminar or workshop style for more intimate and practical teaching sessions. David is constantly learning and expanding his list of topics, and welcomes specific topic requests.

CyberSecurity: Staying secure in a Hyper-Connected World

Online security is a growing concern for many. To minimize risk and protect yourself, it is important to become educated with the issues and best practices for prevention. David will provide you easy cybersecurity tips to shield you online, help you feel more comfortable, and keep your family more secure.

Educate yourself and increase your awareness to prevent many issues.

Actionable insights from this session include:

- Personal tips on identity theft, passwords, viruses and ransomware, phishing attacks, staying safe on WiFi, and shopping online
- Corporate tips to help you at work with education, awareness, assessments and audits, helpful reminders and a great bonus sheet
- Tips for kids online with issues that exist, education, and available software to help protect them

Remember, we protect ourselves on a best-effort basis with limited time while the bad guys are full-time professionals. Come learn some easy tips on how to protect yourself against online threats and risks.
